Attn: Carl Tudor, President

Dear Mr. Tudor:

I would like to commend your company on the excellent work your crew did in completing the concrete cathodic protection metalizing rehabilitation of the underside of the roadway slab on both Tubes of the Brooklyn Battery Tunnel. The individuals that performed this work gave us their best performance and cooperation.

We are especially grateful to you and Mr. Dennis Deavours, Project Manager, for your efforts to arrange work performance to accommodate the project schedules. We also would like to recognize all the IMC staff that aided in coordinating the details of this project in a manner that guaranteed its success.

Very truly yours,

Nejat O. Hedvat, P.E.
Resident Engineer
